

Is Delighted To Announce The Addition Of Our Delta Players & Service At

November 19, 2007 Pacific Palisades CA RadioWeb is delighted to have been asked to deploy at one of Western Canada's premiere small Inn's – the Beacon Inn at Sidney B.C... The Inn is a small, urban inn that provides elegant yet very reasonably priced accommodation with a complimentary, gourmet breakfast.

In the midst of BookTown, and close to Butchart Gardens, whale watching, world-class diving, three great **wineries** and all Victoria, British Columbia has to offer. Also a key transportation hub, near excellent public transit system and are close to Victoria International Airport, BC Ferries to Vancouver & the Gulf Islands, the Washington State Ferry to the San Juan Islands and Anacortes, and numerous Marinas.

Built in 2001, the Beacon Inn at Sidney is designed in an Edwardian (early 1900s) inspired style. The paint colors, furniture and draperies reflect an earlier time, yet the individually designed guest rooms have all the modern conveniences. Our parlor, with its fireplace, books and magazines will entice you to settle in and relax. We do have wireless Internet access throughout the inn, but if you require it, we do have an Ethernet connection in the lobby.

Enjoy coffee or tea available outside your door one half hour before your complimentary full breakfast, served at one of two set times in either our warm and intimate dining room or in the sunshine on our front patio.

So what are you waiting for... come discover for yourself why readers of *Travel & Leisure Magazine* have named Vancouver Island "The Best Island in the Continental U.S. and Canada," and Victoria as the 9th best city.

Now, this unique and charming resort will be offering guest's internet audio entertainment from over 10,000 locations around the world with deployment of RadioWeb Delta players replacing traditional am/fm clock radio's in every one of their amazing suites! Imagine waking up to the sounds of new age audio from Japan, or tuning into the same news station you do when at home while enjoying coffee in a place far from the grind of the everyday.

Whether you simply want to stay in touch, enjoy audio only available in largely commercial free streams from around the planet or explore what is being said, played and heard all over the world – The Beacon Inn has now added a fascinating dimension to the guests experience.
