PACIFIC PALISADES, Calif. & NETTETAL, Germany--(BUSINESS WIRE)--July 28, 2006--RadioWeb Communications Inc. ([www.radioweb.com](http://www.radioweb.com)) has been named exclusive supplier of Terratec Electronic GmbH. ([www.terratec.com](http://www.terratec.com)) Noxon Internet Radio products for the hospitality, lodging, retirement community and transient accommodation markets in North America.

RadioWeb offers the first service designed exclusively for high-end hospitality operations that enables listeners to tune in to any of the over 10,000 Internet Based radio stations or 5,000+ podcasts on the planet currently streaming online -- by simply upgrading the old clock radio! RadioWeb's proprietary, secure, full-service Internet hosting capability also makes it possible for operators to deliver custom audio and text messages to each resident or guest using the system!

Terratec brings over 10 years of PC and web-enabled audio technology expertise to RadioWeb's service. The Noxon line of Internet radio players are stylish state-of-the-art appliances that can be configured to meet the demands of RadioWeb's very discerning clients.

"We're thrilled to team with Terratec in delivering the first revolutionary change in a hotel room since the arrival of cable TV," said RadioWeb President Rhos B. Dyke. "We have tested our service in some of the most demanding hospitality service markets, and know the Noxon players will more than exceed our requirements, and more importantly, client expectation."

Heiko Meertz, founder and GM for Terratec, added, "RadioWeb is the ideal North American market entry partner for us. They are focused in a space ideally suited for our products, servicing consumers far from home, and hungry for entertainment, news, sports and content not available in a conventional TV service."

RadioWeb will immediately make available its service in 2 form factors; the Noxon 1 Radio and Noxon 2 Radio. Both are pictured here, and available for demonstration today.
